

9.2 Written and Activity Assignment - Functional Test Plan

Jeff Pedersen

Computer Information Systems, Bellevue University

CIS623 Software Testing and Quality

February 22, 2026

All these tests will be run against the [Parking Cost Calculator from week 8](#). Hourly, daily, and weekly cost indicated in the parking rates for this application will be used for these tests unless they directly violate the rules of the scenario (economy parking is the only selection which should receive free 7th day parking).

I used Chrome as my browser when performing all tests because it is one of the most widely used web browsers and therefore it will mimic the real user's experience.

I used a modified version of CIS 623 – Functional Test Plan.doc as my testing template so that I could adjust the sizing of the table columns and omit the elements that I did not need to include.

Functional Test Plan For: Parking Lot Cost Estimation Calculator

Version: [1.0]

Track It or SCRUM Tracker #	Prepared By	Date	Stakeholder Approval Signature / Date
N/A	Jeff Pedersen	02/18/2026	X_____

Overall Test Result: Pass X Fail

Tester: Jeff Pedersen | Test Date: 02/18/2026

- **Test Objective #1:** Verify Long-Term Garage produces the correct cost estimate for 1 day and 3 hours.
- **Assumptions:** the hourly charge is \$2.00, any time between 6 hours and 24 hours will be \$12.00 only as that is the maximum daily charge.
- **Dependencies:** Tester has a compatible Chrome web browser.
- **Tested On:** Google Chrome Version 145.0.7632.76

Step	Procedure Description	Expected Result	Actual Result	Pass/Fail
1	Open Parking estimate app in chrome	App loads successfully and fields for parking choice entry and leaving Date/Time are shown	App Successfully loads and the parking type selector and Date/Time fields are present for both entry and leaving	Pass
2	Select Long-Term Garage Parking	Long-term Garage is selected	Long-term Garage is selectable	Pass

3	Enter the entry Date/Time of 03/01/2026 08:00 AM	Entry Date/Time are accepted	Entry Date/Time are accepted	Pass
4	Enter the leaving Date/Time of 03/02/2026 11:00 AM	Leaving Date/Time are accepted	Leaving Date/Time are accepted	Pass
5	Calculate the cost	Cost is calculated as \$18.00 (\$12 max daily + \$6 for 3 hours at \$2 per hour)	Estimate Parking cost is displayed as \$18.00	Pass

Developer Approval Signature X_____

Tester: Jeff Pedersen | Test Date: 02/18/2026

- **Test Objective #2:** Verify that only Economy parking applies the free 7th day. (per the scenario requirements even though the parking application demo we were given to use in week 8 has parking rates that indicate that the free 7th day parking is applied to all parking options except for short-term and valet parking)
- **Assumptions: Economy** \$9.00 daily maximum, \$54.00 per week (7th day free). Valet \$18 per day, Short-Term \$24.00 daily maximum, Long-Term Garage \$12.00 daily maximum, Long-Term Surface \$10.00 daily maximum
- **Dependencies:** Tester has a compatible Chrome web browser.
- **Tested On:** Google Chrome Version 145.0.7632.76

Step	Procedure Description	Expected Result	Actual Result	Pass/Fail
1	Open Parking estimate app in chrome	App loads successfully and fields for parking choice entry and leaving Date/Time are shown	App Successfully loads and the parking type selector and Date/Time fields are present for both entry and leaving	Pass
2	Select Economy Parking	Economy is selected	Economy is selectable	Pass
3	Enter the entry Date/Time of 03/01/2026 08:00 AM	Entry Date/Time are accepted	Entry Date/Time are accepted	Pass

4	Enter the leaving Date/Time of 03/08/2026 08:00 AM	Leaving Date/Time are accepted	Leaving Date/Time are accepted	Pass
5	Calculate the cost	Total estimated cost of \$54.00 (6 days + free 7 th day)	Estimated parking cost is \$54.00	Pass
6	Select Valet Parking	Valet is selected	Valet parking is selectable	Pass
7	Calculate the cost	Total estimated cost of \$126.00 for 7 days at \$18.00 per day	Estimated parking cost is \$126.00	Pass
8	Select Short-Term Parking	Short-Term is selected	Short-Term parking is selectable	Pass
9	Calculate the cost	Total estimated cost of \$168.00 for 7 days at \$24.00 per day	Estimated parking cost is \$168.00	Pass
10	Select Long-Term Garage Parking	Long-Term Garage is selected	Long-Term Garage Parking is selectable	Pass
11	Calculate the cost	Total estimated cost of \$84.00 for 7 days at \$12.00 per day	Estimated parking cost is \$72.00	Fail
12	Select Long-Term Surface Parking	Long-Term Surface is selected	Long-Term Surface Parking is selectable	Pass

13	Calculate the cost	Total estimated cost of \$70.00 for 7 days at \$10.00 per day	Estimated parking cost is \$60.00	Fail
----	--------------------	---	-----------------------------------	------

Tester: Jeff Pedersen | Test Date: 02/18/2026

- **Test Objective #3:** Verify that a leaving time of before the entry time is invalid
- **Assumptions:** All parking selections will not allow a leaving Date/Time which is before the entry date/time
- **Dependencies:** Tester has a compatible Chrome web browser.
- **Tested on:** Google Chrome Version 145.0.7632.76

Step	Procedure Description	Expected Result	Actual Result	Pass/Fail
1	Open Parking estimate app in chrome	App loads successfully and fields for parking choice entry and leaving Date/Time are shown	App Successfully loads and the parking type selector and Date/Time fields are present for both entry and leaving	Pass
2	Select Valet parking	Valet parking is selected	Valet parking is selectable	Pass
3	Enter an entry Date/Time of 03/01/2026 08:00 AM	Entry Date/Time are accepted	Entry Date/Time are accepted	Pass
4	Enter a leaving Date/Time of 03/01/2026 07:00 AM	Leaving Date/Time are rejected and an indicator tells you that the leaving time cannot be before the entry time	Leaving Date/Time are accepted	Fail

5	Calculate the cost	The app will not allow the cost to be calculated and indicates that your entry time is after your leaving time	The Estimated Parking Cost is \$0.00 however the total parking duration is calculated as -1 day and 23 hours and there is no indicator other than the negative duration that anything is wrong	Fail
6	Change the selection to Short-Term parking	Short-Term parking is selected	Short-Term parking is selectable	Pass
7	Calculate the cost	The app will not allow the cost to be calculated and indicates that your entry time is after your leaving time	The Estimated Parking Cost is \$0.00 however the total parking duration is calculated as -1 day and 23 hours and there is no indicator other than the negative duration that anything is wrong	Fail
8	Change the selection to Economy parking	Economy parking is selected	Economy parking is selectable	Pass

9	Calculate the cost	The app will not allow the cost to be calculated and indicates that your entry time is after your leaving time	The Estimated Parking Cost is \$0.00 however the total parking duration is calculated as -1 day and 23 hours and there is no indicator other than the negative duration that anything is wrong	Fail
10	Change the selection to Long-Term Garage parking	Long-Term Garage parking is selected	Long-Term Garage parking is selectable	Pass
11	Calculate the cost	The app will not allow the cost to be calculated and indicates that your entry time is after your leaving time	The Estimated Parking Cost is \$0.00 however the total parking duration is calculated as -1 day and 23 hours and there is no indicator other than the negative duration that anything is wrong	Fail
12	Change the selection to Long-Term Surface parking	Long-Term Surface parking is selected	Long-Term Surface parking is selectable	Pass

13	Calculate the cost	The app will not allow the cost to be calculated and indicates that your entry time is after your leaving time	The Estimated Parking Cost is \$0.00 however the total parking duration is calculated as -1 day and 23 hours and there is no indicator other than the negative duration that anything is wrong	Fail

Mind Map

I found this video to be very helpful <https://www.youtube.com/watch?v=55U911gTOks> when creating my mind maps for my test plan. (AB Automation Hub, 2023) It was one of the reasons why I decided to use Xmind to create my mind map it was very easy to use and had a lot of options even in the free version. Ther were many more features with the paid version but nothing that was a critical must have option for this assignment.

Mind Map created with XMind (XMind: The Best AI Brainstorming & Mind Mapping Tool, 2026).

Test 4

Verify that a leaving date of before the entry date is invalid

- Step 1 Open Parking estimate app in chrome
- Step 2 Select Valet parking
- Step 3 Enter an entry Date/Time of 03/02/2026 08:00 AM
- Step 4 Enter a leaving Date/Time of 03/01/2026 08:00 AM
- Step 5 Calculate the cost
- Step 6 Change the selection to Short-Term parking
- Step 7 Calculate the cost
- Step 8 Change the selection to Economy parking
- Step 9 Calculate the cost
- Step 10 Change the selection to Long-Term Garage parking
- Step 11 Calculate the cost
- Step 12 Change the selection to Long-Term Surface parking
- Step 13 Calculate the cost
