Professional Summary

A Full-Stack Developer, Web Designer and Database Engineer with a Master's and Bachelor's in Software Development, and Associate's in Web Design.

Strong academic background in software engineering, web development, and application design, with experience building full-stack applications and writing organized, maintainable code.

Demonstrates strong problem-solving, collaboration, and independent development skills, with a commitment to continuous learning and staying current with modern technologies, frameworks, and development best practices.

Education

Master's Degree of Computer Information Systems

Bellevue University | March 2026 | GPA 4.0

Bachelor's Degree of Software Development

Bellevue University | January 2024 | GPA 3.9

Associate's Degree of Web Development

Gateway Technical College | April 2017 | GPA 3.8

Technical Skills

Programming Languages

Java, JavaScript, Python, SQL, HTML, CSS, PHP, NoSQL, XML

Frameworks & Libraries

React, Node.js, jQuery, Spring, Spring Boot, .NET, ThemeLeaf, WordPress, Bootstrap, Tailwind, Drupal

Databases

MySQL, MongoDB, SQLite, Microsoft SQL Server

Tools & Technologies

Git, GitHub, REST APIs, JSON, AJAX, Maven, Gradle, Eclipse, Android Studio, VSCode, Photoshop, InkScape

Cloud & DevOps

AWS, Microsoft Azure, Google Cloud, CI/CD Concepts, DevOps Principles, Cloud Computing

Certificates

Meta Front-End Developer Specialization | Coursera | 2024

- React Basics
- Advanced React
- Programming with JavaScript
- Version Control
- UX/UI Design Principles
- Front-End Capstone Project

<https://coursera.org/verify/professional-cert/LQ4MNZBFUN9S>

AWS Fundamentals Specialization | Coursera | 2024

- AWS Cloud Technical Essentials

- Migrating to the AWS Cloud
- Architecting Solutions on AWS

<https://coursera.org/verify/specialization/HT3B6GQC9Q98>

DevOps on AWS Specialization | Coursera | 2024

- Code, Build, and Test Automation
- Release and Deployment Pipelines
- Monitoring and Operational Practices

<https://coursera.org/verify/specialization/CH0XQDGUXXAO>

Software Projects

Grade Book Application

Java, JavaFX, CSS, CSV Data Storage

- Developed a desktop application for managing student records and course grade data
- Implemented object-oriented design using model, controller, and service classes
- Created data persistence functionality using CSV storage and retrieval
- Built a JavaFX user interface for data entry, record management, and data display

Developer Portfolio Website

React, JavaScript, HTML, TailwindCSS, Git

- Designed and developed a responsive portfolio website to showcase software projects and technical skills
- Implemented reusable React components and modular UI architecture
- Applied responsive web design techniques to support multiple screen sizes
- Organized project content and technical information for professional presentation

Book Club Web App

Spring Boot, MongoDB, ThymeLeaf

- Developed a full-stack web application for managing book collections and reading lists
- Implemented backend services using Spring Boot and Java

- Integrated MongoDB database for persistent data storage and retrieval
- Built server-rendered web pages using ThymeLeaf templates

Weight Tracker Android Mobile App

Android, Java, XML, SQLite

- Developed an Android application for tracking weight loss progress and historical records
- Implemented SQLite database for persistent storage of user entries
- Designed a user interface using Android layout components and resource management
- Implemented CRUD functionality for managing user records
